DETAILED ACTION

1. This Office Action is the answer to the communication received on 03/08/2004.
2. Claims 1-18 are pending in this application wherein claims 1-9 are canceled.

Drawings

3. The submitted drawings (03/08/2004) are accepted for examination purposes.

Claim Rejections - 35 USC § 112

4. Independent claim 1, is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01.

A. As to claim 1: in this method claim, the omitted step of how to control a vehicle, the claim only cites a linking between abstract components: regulation and control functions (please note that there are numerous of these “linkings” in a vehicle; further, the applicants do not specify what are these specific components that “interlink” together, this is very unclear – just explain that these regulation or control functions are defined by graphs containing nodes and directed gridlines does not help to clarify this vague claim.

B. As to dependent claims 11-18, it is unclear to represent functions and variables with different characters, applicants only cite an abstract idea of “interlink” of these characters without explaining “how, when, what, why” about a step of controlling a vehicle.

Conclusions

5. The prior art made of record, which are listed in PTO-892, and not relied upon are considered pertinent to applicant's disclosure.
